

# A resolution revolution in prostate cryotherapy with the 8848 transducer

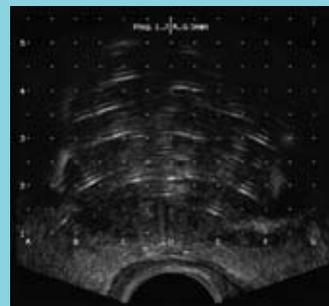

- Establish the base of the prostate with simultaneous biplane.
- No gland too large. See the entire prostate - from base to apex.
- A complete 180° visual field expanded sector in transverse.

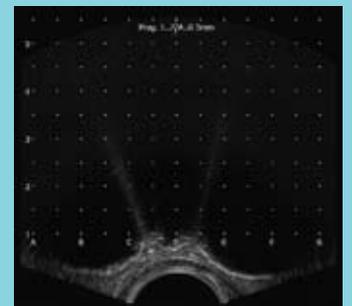

*Volume measurement of a large prostate before cryotherapy - transverse view*

*Length measurement before cryotherapy - midline sagittal view*

*Cryo needle placement - transverse view*

*Large prostate just after cryotherapy - the iceball can be clearly seen in transverse view*
